## Super Condensate Sealant (Grey)

**PART NO: PLI-200-HP-SC-SEAL**

PLI SUPER CONDENSATE VALVE SEALANT (GREY) is a last line of defence in valve maintenance, i.e. a valve must be sealed at all costs to eliminate the need for an untimely shut down. Our valve sealant contains no PTFE-fillers, will not harden and is excellent for emergency seat renewal and low pressure sealing problems. It is designed for H<sup>2</sup>S and CO<sup>2</sup> service and is immiscible in condensate. This elevates the problem of valves becoming seized or stiff to cycle in condensate service, and improves valves integrity to seal online.

### PACKAGING

40Lb Pails (20 Ltr)

### PART NUMBER

PLI-200-HP-SC-SEAL

### SAFETY DATA SHEET

Available for download from PLI website  
[www.pressurelube.com.au](http://www.pressurelube.com.au)

Manufactured in the USA by  
Lubchem for PLI formulation.
